EDUCATION

Fordham University | Bachelor of Science, Computer Science **May 2026**
Relevant Coursework: Data Structures and Algorithms, Database Systems, Operating Systems, Computer Networks, Data Mining

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, Swift, SQL, HTML, CSS
Web and Backend: React, Next.js, Node.js, REST APIs, Tailwind CSS, SwiftUI
AI and Data: PyTorch, TensorFlow, scikit-learn, AWS Bedrock, model evaluation, data pipelines
Tools and Practices: Git, GitHub, Postman, Jupyter Notebook, VS Code, FFmpeg, Agile, unit testing, SDLC

EXPERIENCE

Artificial Intelligence Product Intern | Adaptive Security **May 2025 - Mar 2026**
Early-stage security startup | Python | Node.js | FFmpeg | React | Next.js | REST APIs

- Built a Python and Node.js service automating a four-stage FFmpeg media pipeline (transcription, segmentation, generation, export), cutting production time roughly 80%.
- Developed an internal React and Next.js console for launching and monitoring long-running jobs, with retry logic, structured error handling, and job-state logging.

Back-End Software Engineering Intern | Anote **Aug 2023 - Dec 2023**
Early-stage data-labeling startup | Python | scikit-learn | BERT | SetFit | GPT-3.5

- Engineered a Python evaluation harness benchmarking fine-tuned GPT-3.5, SetFit, and BERT with stratified k-fold cross-validation, reporting macro-F1, precision, recall, and inference latency.
- Built a dataset quality pipeline (schema validation, leakage detection, class-balance auditing) and standardized preprocessing so results stayed reproducible across engineers.

AI/ML Development Intern | Cornell Tech, Break Through Tech AI **Jun 2023 - Aug 2023**
Competitive applied-ML fellowship | Python | scikit-learn | ML pipelines

- Built supervised learning pipelines with reproducible splits, metric tracking (precision, recall, F1, confusion matrices), and error analysis; presented model tradeoffs to non-technical stakeholders.

Peer Instructor and Academic Counselor | Fordham CSTEP **Sep 2023 - May 2025**
Curriculum design | Pre-Calculus | Introduction to AI

- Designed and taught a full Pre-Calculus curriculum and an introductory AI course for high school seniors within a 100+ student STEM program.

PROJECTS

Aspect Niche | aspectniche.com | github.com/devauntea/aspect-niche-web **Jan 2026**
TypeScript | Next.js | React Flow | d3-force | Groq LLM API | Tailwind CSS

- Built and deployed a full-stack activity discovery app with an interactive graph UI supporting pan, zoom, force-directed clustering, and progressive node expansion.
- Designed a dynamic graph data model with real-time node expansion and integrated an LLM API behind server-side routes for personalized recommendations and starter checklists.

Garment Prediction | github.com/devauntea/Garment-Prediction **2025**
Python | PyTorch | torchvision | scikit-learn | computer vision

- Built a reproducible image-classification pipeline split into manifest, preprocessing, training, and evaluation stages, rerunnable end to end from a single command.
